

**It Is Time Campaign**  
**Questions and Answers**

**1. When will the final cost be known?**

We anticipate having a confirmed final cost within the next few months, as updated pricing and construction details are finalized.

**2. Considering the significant construction accomplishments already funded, why can't the multipurpose facility be completed with the remaining available funds?**

The facility is substantial in size and scope. Construction costs have increased significantly since the initial funds were raised, resulting in a gap between early projections and current estimates.

**3. Given that the church already owns the land, the site has been cleared, the water retention system completed, and parking installed, why will this new facility cost \$5.5 million or more?**

While important site work has already been completed, the building itself represents the largest portion of the investment. Rising material and labor costs, along with the facility's flexibility to serve multiple ministries and community functions, contribute to the overall cost.

**4. Once the facility is completed, how will the church fund its annual operating costs?**

The strong and enthusiastic response from church members demonstrates a clear commitment to supporting this facility. Ongoing stewardship, thoughtful budgeting, and responsible planning will ensure sustainable operations.

**5. How will the facility advance Rumble's mission of Education, Mission, Community, and Worship?**

The new facility will provide dedicated, flexible space to expand educational programs, support mission initiatives, strengthen community outreach, and enhance worship opportunities. For specific examples, please refer to the Case for Support.

**6. What contributions, other than financial gifts, would benefit the campaign?**

In addition to monetary contributions, gifts of appreciated assets, estate planning commitments, volunteer time, and professional expertise are all meaningful ways to support the campaign. A committee member would be happy to discuss options that align with your interests.
